Solar Works, Inc. Announces Expanded Management Team and Investment Funding

Montpelier, VT – Citing high demand for its services, Solar Works, Inc. today announced that it has expanded its executive management team with the addition of Ron French as CEO and Tim Seamans as COO/CFO. Additionally, the company has secured incremental financing through the sale of common stock to fund its future growth and expansion.

“I am very excited about having Ron and Tim on board to help guide the company to the next level,” said Leigh Seddon, President of Solar Works. “Solar Works has a wealth of experience with over 20 years as a leader in the renewable energy industry. We now have the additional management, technical and financial resources to effectively advance our business growth.”

Mr. Seddon, the founder of Solar Works, will continue in his current capacity as company President. Mr. French, who has extensive sales and marketing experience with technical product and service companies such as WebMD, Metromedia Fiber Network and Apple Computer, will serve as the company’s chief executive. Mr. Seamans, most recently the CFO and Operations VP for both Quelsys, Inc. and Uniscribe, Inc., brings significant expertise to both financial and operational roles and will head up these functions for the company.

“The opportunities in the solar industry are tremendous,” said Ron French. “Solar Works had done some of the most significant and innovative projects in the industry. Our recent completion of the Stonyfield Farm project, the largest photovoltaic plant in the state of New Hampshire, being a case in point. Now as more commercial and residential customers begin to better understand not only the environmental but also the financial benefits of solar technology, Solar Works will be well positioned to provide superior renewable energy solutions”.

About Solar Works Inc.

Solar Works, Inc. (www.solarworksinc.com) is the leading solar electric systems integrator in the Northeast serving commercial, institutional and residential customers. Over the past 25 years, Solar Works has installed over 800 renewable energy systems. Solar Works has expertise in engineering design, project management, performance analysis, project financing and renewable energy credit programs. Founded in 1980, Solar Works is active in commercializing new technologies and developing renewable energy programs for both public and private sector clients.
