LEADING-EDGE RENEWABLE ENERGY DEVELOPERS FORM UNIQUE STRATEGIC ALLIANCE

Tamarack Energy, Inc and Solar Works, Inc. Expand Renewable Energy Offerings

March 6, 2006: Tamarack Energy, Inc. of Boston, MA and Solar Works Inc. of Montpelier, VT, announced today that they have entered into a long-term strategic alliance to jointly develop renewable energy projects. The strategic alliance combines Tamarack Energy's development and financing capabilities with the technical expertise of Solar Works to serve customers nationwide.

"Tamarack Energy has embraced a holistic and collaborative approach with clients, offering a portfolio of renewable energy solutions including solar, wind, biomass, combined heat and power and geothermal energy technologies," said Tamarack Energy President Derek Amidon. "By joining forces with Solar Works Inc., we have aligned with one of the top tier solar engineering design and installation firms in the country with over 25 years of experience. We see their expertise as adding tremendous value to our customers."

Ron French, CEO of Solar Works, Inc. commented, "We're seeing unprecedented demand from our commercial, educational and institutional customers for solar electric solutions. Through our partnership with Tamarack Energy, we will be uniquely able to help our customers to assess not only their solar energy needs, but also fulfill a broader renewable energy strategy for their organization".

Over the past year, Solar Works and Tamarack Energy have been jointly working on several renewable energy projects. "While solar will be a leading component of most renewable energy deployments, it is increasingly clear that, a renewable energy strategy for educational institutions or commercial enterprises can not be built upon a single technology," said Amidon. "With our combined expertise, we offer an optimal approach."

Renewable Energy Developers -- 2

Tamarack Energy, Inc. (www.tamarackenergy.com) is an independently operated subsidiary of Haley & Aldrich, Inc., a national environmental and engineering consulting company that has been in business for nearly 50 years managing technically challenging projects in the U.S. and internationally. Tamarack is led by a team of experienced energy systems project developers, energy economists and program managers who have participated in the development of more than 500 megawatts of renewable energy.

Solar Works, Inc. (www.solarworksinc.com) is a renewable energy systems integrator and developer, providing solar electric (photovoltaic), solar thermal and wind power systems for clients worldwide. Over the past 25 years, Solar Works has installed over 750 renewable energy systems. Solar Works has expertise in engineering design, project management, performance analysis, project financing and renewable energy credit programs. Founded in 1980, Solar Works is active in commercializing new technologies and developing renewable energy programs for both public and private sector clients.
